```
import React from 'react'
import styled from 'reshadow'

export const SnippetList = ({
    styles,
    title,
    children,
    Snippet,
    ...props
}) ⟹ styled(styles)(
    <container {...props}>
        <title as="h3">{title}</title>

        {/* SnippetList markup */}

        {children.map(Snippet)}
    </container>
)
```

@**levitan** / market / SnippetList / index.js

```javascript
import React from 'react'

import {SnippetList as Base} from '@levitan/core'
import {Snippet, register} from '@levitan/market'

import styles from './styles.css'

class SnippetList extends React.Component {
    static defaultProps = {
        variant: 'normal',
        direction: 'horizontal',
    }
}

const context = {styles, Snippet}

export default register(Base, context)(SnippetList)
```
